Work permit: German Gender: Male Date of birth: 07/08/2004 Place of birth: Bhavnagar Gujarat, India Nationality: Indian

ABOUT ME

Results-driven Python developer with extensive experience in web development, machine learning, and API design. Strong foundation in frameworks like Django and Flask and passion for integrating AI and IOT technologies.

EDUCATION AND TRAINING

[01/10/2025 – Current]

Master of Science in Computer Science

IU International University of Applied Sciences

City: Berlin | Country: Germany | Field(s) of study: Information and Communication Technologies

[01/08/2021 – 30/07/2024]

Bachelor of Science in Information Technology

UKA TARSADIA University

City: Bardoli, Gujrat | Country: India | Field(s) of study: Information and Communication Technologies

SKILLS

Technical Skills

Python Programming (Automation, Small Scripts) | Version Control (Git/GitHub) | Web Development | Data preprocessing

Organizational & Soft Skills

Time Management & Punctuality | Reliability & Work Ethic | Problem-Solving | Adaptability & Quick Learning | Team Work

Backend

Django | Flask | Python (NumPy, Pandas, NLTK, Matplotlib, sklearn, TensorFlow) | API Development | socket.io

Database

PostgresSql | MySQL

frontend

HTML | CSS | Javascript | jQuery

WORK EXPERIENCE

skylineinfosys skylineinfosys.com

City: Surat, Gujrat | Country: India

[01/09/2024 – 30/11/2024]

Python Developer Intern

- Implemented **Supervised, Unsupervised, and Reinforcement Learning** models for diverse real-world applications.
- Built a **Python/Django web scraper** to extract and analyze high-volume Amazon product data.
- Designed a **Django-based Movie Recommendation System** utilizing user preference modeling.
- Optimized **Deep Learning models** for higher accuracy and performance using large-scale datasets.

PROJECTS

[Current]

Movie Recommendation & Management System | Django, jQuery, MySQL

- **Full-Stack Development:** Built a responsive Django & MySQL web app featuring custom database architecture, TMDB API integration, and secure user authentication.
- **Intelligent Recommendations:** Engineered a recommendation engine using behavioral analytics and watch history to deliver personalized content based on user mood.
- **Social & Personalization Features:** Implemented profile management tools allowing users to curate private watch lists and share public favorites via social integration.

Real-Time Multiplayer Bingo Platform | Flask, Socket.IO, JQuery

- **Real-Time Architecture:** Developed a low-latency multiplayer engine using **Socket .IO** and **event-driven backend logic** to synchronize game states and verify "Bingo" events across concurrent sessions.
- **Matchmaking & Social:** Engineered a **room-based matchmaking system** with unique session codes and an asynchronous in-game chat for seamless user interaction.
- **Single-Player AI:** Programmed a **server-side AI opponent** to simulate competitive game play, ensuring a robust experience for solo users.

Game Zone Management System | Django, MySql

- **Multi-Tenant Architecture:** Engineered a scalable platform for gaming clubs featuring a **dynamic scheduling algorithm** to manage real-time slot availability and prevent double-bookings.
- **Secure Financial Logic:** Developed a **digital wallet system** with automated transaction logging and seamless credit-based payments for bookings.
- **Hierarchical Access Control:** Implemented **RBAC** with tailored interfaces for Customers, Club Managers, and Super-Admins, including an analytics suite for monitoring financial health and system performance.

LANGUAGE SKILLS

Other language(s): English (B2) , German (B1 Ongoing)
